PSYCHOSOMATICS INDEX to Volume 24, 1983

Subject Index

Adolescence
Interdisciplinary approach to conversion disorders in adolescent girls. Oberfield RA, Reuben RN, Burkes LJ. Nov 983.
Psyche and soma of physical illness during adolescence. Schowalter JE. May 453.

Adolescent psychiatry: See **Adolescence.**

Adverse reactions
Catatonic-like syndrome (letter). Mashiah T, Mashiah A. Nov 1016.
Deep-vein thrombosis with antipsychotic drugs (case report). Varia I, Krishnan RR, Davidson J. Dec 1097.
Intraocular pressure in patients receiving psychotropic medications. Reid WD, Rakes S. Jul 665.
Sexual side effects of antidepressant drugs. DeLeo D, Magni G. Dec 1076.
See also **Lithium, Metrizamide.**

Affective disorders
Treatment of emotional lability with low-dosage tricyclic antidepressants (case report). Schiffer RB, Cash J, Herndon RM, Dec 1094.
See also **Bipolar disorder, Depression.**

Aging: See **Geriatrics.**

Alcoholism
Alcoholic neuropathy associated with the eighth cranial nerve (case report). Shen WW. Apr 407.
Computerized alcoholism profile (letter). Hoffman RG. Sept 818.
Computerized biochemical profiles for alcoholism (letter). Hamer RM (reply, Beresford TP). Jul 659.
Principles of disulfiram use. Keiter RA. May 483.

Allergy
'Allergic to everything': A medical subculture. Brodsky CM. Aug 731.

Amobarbital
Amobarbital interview (letter). Feldman J. (reply, Roy-Byrne PP, Edelstein CK). Dec 1092.
Use of the amobarbital sleep threshold in a withdrawn catatonic patient (case report). Kramer MS. Jun 593.

Analgesia: See **Pain.**

Anemia, sickle cell
Psychopathology in patients with sickle cell disease. Leavell SR, Ford CV. Jan 23.

Anorexia nervosa
Anorexia nervosa and bulimia (psychosomatic illness review). Halmi KA. Feb 111.
Onset of anorexia nervosa after prolonged use of the Milwaukee brace (case report). Bernstein AE, Warner GM. Nov 1033.

Anticoagulants
Anticoagulant for dementia? (letter) Walsh AC. (reply, Walker WR). Jun 585.

Antidepressive agents
Clomipramine in obsessive-compulsive disorder: A review. Ananth J. Aug 723.
Sexual side effects of antidepressant drugs. DeLeo D, Magni G. Dec 1076.
Treatment of emotional lability with low-dosage tricyclic antidepressants. Schiffer RB, Cash J, Herndon RM. Dec 1094.

Antipsychotic agents:
See **Tranquilizing agents, major.**

Anxiety disorders
Urinary free cortisol levels in anxiety. Rosenbaum AH, Schatzberg AF, Jost FA III, Cross PD, Wells LA, Jiang N-S, Maruta T. Sept 835.
See also **Panic.**

Aphasia
Aphasia *vs* functional disorder: Factors in differential diagnosis (case report). Sevush S, Brooks J. Sept 847.

Appetite disorders
Anorexia nervosa and bulimia (psychosomatic illness review). Halmi KA. Feb 111.
Anorexia nervosa in the male: An underdiagnosed disorder. Andersen AE, Mickalide AD. Dec 1066.
Bulimia and diabetes: A potentially life-threatening combination (case report). Hillard JR, Lobo MC, Keeling RP. Mar 292.
Kleine-Levin, Klüver-Bucy, and encephalitis lethargica (letter). Pies R (reply, Orlosky MJ). Feb 167.
Nutritional counseling as an adjunct to psychotherapy in bulimia treatment. Willard SG, Anding RH, Winstead DK. Jun 545.
Onset of anorexia nervosa after prolonged use of the Milwaukee brace (case report). Bernstein AE, Warner GM. Nov 1033.

Asthma
Childhood asthma (psychosomatic illness review). Fritz GK. Nov 959.

Autoimmune deficiency syndrome
Psychiatric aspects of AIDS (perspective). Nichols SE Jr. Dec 1083

Behavior therapy
Relaxation training for anticipatory nausea associated with chemotherapy (case report). Weddington WW Jr, Blindt KA, McCracken SG. Mar 281.
Systematic desensitization for anticipatory nausea associated with chemotherapy (case report). Hailey BJ, White JG. Mar 287.
See also **Clomipramine.**

Bipolar disorder
Lithium and relapse prevention in manic-depressive illness. Schou M. Jun 533.

Blindness: See **Usher's syndrome.**

Blood glucose: See **Hypoglycemia.**

Systematic desensitization for anticipatory

nausea associated with chemotherapy (case report). Hailey BJ, White JG. Mar 287.

Case reports
Alcoholic neuropathy associated with the eighth cranial nerve. Shen WW. Apr 407.
Aphasia *vs* functional disorder: Factors in differential diagnosis. Sevush S, Brooks J. Sept 847.
Atypical psychosis in Usher's syndrome. Mangotich M, Misiaszek J. Jul 674.
Bulimia and diabetes: A potentially life-threatening combination. Hillard JR, Lobo MC, Keeling RP. Mar 292.
Change in depression score during mononucleosis. Pies R. Aug 766.
Conversion dysphagia in children. Koon RE. Feb 182.
Deep-vein thrombosis with antipsychotic drugs. Varia I, Krishnan RR, Davidson JR. Dec 1097.
Hyperthyroidism and panic attacks. Katerndahl DA, Vande Creek L. May 491.
Migraine as an organic cause of monocular diplopia. Drake ME Jr. Nov 1024.
Onset of anorexia nervosa after prolonged use of the Milwaukee brace. Bernstein AE, Warner GM. Nov 1033.
Organic mental disorders associated with metrizamide. Penn JR, Mackenzie TB. Sept 849.
Phencyclidine abuse and depression. Caracci G, Migone P, Mukherjee S. Oct 932.
Phenothiazine analgesia in a patient with psychotic symptoms. Schubert DSP, Patterson MB, Long C. Jun 599.
Relaxation training for anticipatory nausea associated with chemotherapy. Weddington WW Jr, Blindt KA, McCracken SG. Mar 281.
Rescuing the angel within: PCP-related self-enucleation. Moskovitz RA, Byrd T. Apr 402.
Systematic desensitization for anticipatory nausea associated with chemotherapy. Hailey BJ, White JG. Mar 287.
Treatment of depression accompanying panhypopituitarism. Lustman PJ, Kulkarni S, Amado H. Jan 70.
Treatment of emotional lability with low-dosage tricyclic antidepressants. Schiffer RB, Cash J, Herndon RM. Dec 1094.
Treatment of obsessive-compulsive disorder with lithium carbonate. Stern TA, Jenike MA. Jul 671.
Use of the amobarbital sleep threshold in a withdrawn catatonic patient. Kramer MS. Jun 593.

Catatonia
Catatonic-like syndrome (letter). Mashiah T, Mashiah A. Nov 1016.
Use of the amobarbital sleep threshold in a withdrawn catatonic patient (case report). Kramer MS. Jun 593.

Chemotherapy, cancer: See **Cancer.**

Child psychiatry
Conversion dysphagia in children. Koon RE. Feb 182.
Diabetes in children: Family responses and control. Klusa Y, Habbick BF, Abernathy TJ. Apr 367.
School reentry in childhood cancer. Henning J, Fritz GK. Mar 261.

Clomipramine
Clomipramine in obsessive-compulsive disorder: A review. Ananth J. Aug 723.

Colitis, ulcerative
See **Gastrointestinal diseases.**

Colonic diseases, functional
See **Gastrointestinal diseases.**

Computerized tomography
The apparatus of mind: Brain structure and function in mental disorder. Lishman WA. Aug 699.
Organic, psychological, or both? (letter). Green LN (reply, Wise TN). Sept 819.

Computers
Computerized biochemical profiles for alcoholism (letter). Hamer RM (reply, Beresford TP). Jul 659.
Microcomputer use on a consultation-liaison service. Hale MS, De L'aune W. Nov 1003.

Consultation-liaison psychiatry
Consultation-liaison psychiatry and Dr. James Eaton (editorial). Wise TN. May 427.
Gastroenterology: A liaison psychiatrist's perspective. Wise TN. Jan 49.
Liaison psychiatry: A gastroenterologist's perspective. Cooper JN. Jan 48.
Liaison psychiatry and the burn center. Mendelsohn IE. Mar 235.
Microcomputer use on a consultation-liaison service. Hale MS, De L'aune W. Nov 1003.
Psychiatric education in the 1980s: The role of consultation psychiatry (perspective). Hall RCW, Holt RE, Beresford TP. Aug 745.
See also **Hospital psychiatry.**

Contrast media
Organic mental disorder associated with metrizamide (case report). Penn JR, Mackenzie TB. Sept 849.

Conversion disorder
Aphasia *vs* functional disorder: Factors in differential diagnosis (case report). Sevush S, Brooks J. Sept 847.
Conversion dysphagia in children. Koon RE. Feb 182.
Interdisciplinary approach to conversion disorders in adolescent girls. Oberfield RA, Reuben RN, Burkes LJ. Nov 983.

Cortisol: See **Hydrocortisone.**

Crohn's disease: See **Gastrointestinal diseases.**

Deafness: See **Usher's syndrome.**

Defense mechanisms: See **Regression.**

Deglutition disorder
Conversion dysphagia in children. Koon RE. Feb 182.

Delirium
Delirium, OBS, and depression (letter). Oppenheim G (reply, Good WF, Dubovsky SL). Nov 1016.

Dementia
Anticoagulant for dementia? (letter). Walsh AC (reply, Walker WR). Jun 585.

Depression
Caution on stimulants (letter). Robinson DO. Sept 818.
Change in depression scale during mononucleosis (case report). Pies R. Aug 766.
Delirium, OBS, and depression (letter). Oppenheim G (reply, Good WF, Dubovsky SL). Nov 1016.
Diagnosing depression in the hospitalized medically ill. Cavanaugh S, Clark DC, Gibbons RD. Sept 809.
Diagnosis of organic depressive disorders. Dietch JT, Zetin M. Nov 971.
Grief, unresolved grief, and depression. Zisook S, DeVaul RA. Mar 247.
Hypothyroidism—or is it depression? Gold MS, Pearsall HR. Jul 646.
Phencyclidine abuse and depression. Caracci G, Migone P, Mukherjee S. Oct 932.
Primary care management of the depressed hypertensive patient. Burch EA Jr. Apr 389.
Treatment of depression accompanying panhypopituitarism (case report). Lustman PJ, Kulkarni S, Amado H. Jan 70.

Dexamethasone
Neuroendocrine function and endogenous opioid peptide systems in chronic pain. Atkinson JH, Kremer EF, Risch SC, Bloom FE. Oct 899.

Diabetes mellitus
Bulimia and diabetes: A potentially life-threatening combination (case report). Hillard JR, Lobo MC, Keeling RP. Mar 292.
Diabetes in children: Family responses and control. Klusa Y, Habbick BF, Abernathy TJ. Apr 367.

Diagnosis
Diagnosing depression in the hospitalized medically ill. Cavanaugh S, Clark DC, Gibbons RD. Sept 809.
Diagnosis of organic depressive disorders. Dietch JT, Zetin M. Nov 971.
Organic, psychological, or both? (letter). Green LN (reply, Wise TN). Sept 819.

Diagnosis, differential
Aphasia *vs* functional disorder: Factors in differential diagnosis (case report). Sevush S, Brooks J. Sept 847.

Diagnosis, laboratory
Hypothyroidism—or is it depression? Gold MS, Pearsall HR. Jul 646.
Neuroendocrine function and endogenous opioid peptide systems in chronic pain. Atkinson JH, Kremer EF, Risch SC, Bloom FE. Oct 899.
Prolactin levels and effects of neuroleptics. Brown WA. June 569.

Diplopia
Migraine as an organic cause of monocular diplopia (case report). Drake ME Jr. Nov 1024.

Disulfiram
Principles of disulfiram use. Keiter RH. May 483.

Dominance, cerebral: See **Schizophrenia.**

Drug abuse: See **Substance abuse.**

Drugs
See **Adverse reactions; Amobarbital; Antidepressive agents; Chemotherapy, cancer; Disulfiram; Dyskinesia, drug-induced; Lithium; Stimulants; Tranquilizing agents, major.**

Dyskinesia, drug-induced
Respiratory dyskinesia (letter). Bick PA (reply, Jamm MW, Sakland SR, Bitar AH). Feb 163.

Eating disorders: See **Appetite disorders.**

Ecology, clinical: See **Allergy.**

Editorials
Consultation-liaison psychiatry and Dr. James Eaton. Wise TN. May 427.
Francis Peabody revisited: *The care of the patient*, 1983. Graham JR. Sept 779.

Education
Francis Peabody revisited: *The care of the patient*, 1983 (editorial). Graham JR. Sept 779.
Psychiatric education in the 1980s: The role of consultation psychiatry (perspective). Hall RCW, Holt RE, Beresford TP. Aug 745.

Education, medical
The language problem: Integration of psychosocial problems into medical care. Cohen-Cole SA, Friedman CP. Jan 52.
Psychiatric education (letter). Kline MD (reply, Callen KE). Nov 1019.

Emergency psychiatry
Interdisciplinary team approach to emergency psychiatric care. Slaby AE, Goldberg RJ, Wallace SR. Jul 627.

Endocrine diseases
See **Diabetes mellitus, Hypothyroidism, Hypopituitarism, Thyroid diseases.**

Endorphins
Neuroendocrine function and endogenous opioid peptide systems in chronic pain. Atkinson JH, Kremer EF, Risch SC, Bloom FE. Oct 899.

SINEQUAN® (doxepin HCl)

Reference: 1. Barranco SF, Thrash ML, Hackett E, Frey J, et al (Pfizer Pharmaceuticals, Pfizer Inc., New York, N.Y.): Early onset of response to doxepin treatment. *J Clin Psychiatry* 40:265-269, 1979.

BRIEF SUMMARY
SINEQUAN® (doxepin HCl) Capsules/Oral Concentrate
Contraindications. SINEQUAN is contraindicated in individuals who have shown hypersensitivity to the drug. Possibility of cross sensitivity with other dibenzoxepines should be kept in mind.

SINEQUAN is contraindicated in patients with glaucoma or a tendency to urinary retention. These disorders should be ruled out, particularly in older patients.

Warnings. The once-a-day dosage regimen of SINEQUAN in patients with intercurrent illness or patients taking other medications should be carefully adjusted. This is especially important in patients receiving other medications with anticholinergic effects.

Usage in Geriatrics: The use of SINEQUAN on a once-a-day dosage regimen in geriatric patients should be adjusted carefully based on the patient's condition.

Usage in Pregnancy: Reproduction studies have been performed in rats, rabbits, monkeys and dogs and there was no evidence of harm to the animal fetus. The relevance to humans is not known. Since there is no experience in pregnant women who have received this drug, safety in pregnancy has not been established. There are no data with respect to the secretion of the drug in human milk and its effect on the nursing infant.

Usage in Children: The use of SINEQUAN in children under 12 years of age is not recommended because safe conditions for its use have not been established.

MAO Inhibitors: Serious side effects and even death have been reported following the concomitant use of certain drugs with MAO inhibitors. Therefore, MAO inhibitors should be discontinued at least two weeks prior to the cautious initiation of therapy with SINEQUAN. The exact length of time may vary and is dependent upon the particular MAO inhibitor being used, the length of time it has been administered, and the dosage involved.

Usage with Alcohol: It should be borne in mind that alcohol ingestion may increase the danger inherent in any intentional or unintentional SINEQUAN overdosage. This is especially important in patients who may use alcohol excessively.

Precautions. Since drowsiness may occur with the use of this drug, patients should be warned of the possibility and cautioned against driving a car or operating dangerous machinery while taking the drug. Patients should also be cautioned that their response to alcohol may be potentiated.

Since suicide is an inherent risk in any depressed patient and may remain so until significant improvement has occurred, patients should be closely supervised during the early course of therapy. Prescriptions should be written for the smallest feasible amount.

Should increased symptoms of psychosis or shift to manic symptomatology occur, it may be necessary to reduce dosage or add a major tranquilizer to the dosage regimen.

Adverse Reactions. NOTE: Some of the adverse reactions noted below have not been specifically reported with SINEQUAN use. However, due to the close pharmacological similarities among the tricyclics, the reactions should be considered when prescribing SINEQUAN.

Anticholinergic Effects: Dry mouth, blurred vision, constipation, and urinary retention have been reported. If they do not subside with continued therapy, or become severe, it may be necessary to reduce the dosage.

Central Nervous System Effects: Drowsiness is the most commonly noticed side effect. This tends to disappear as therapy is continued. Other infrequently reported CNS side effects are confusion, disorientation, hallucinations, numbness, paresthesias, ataxia, and extrapyramidal symptoms and seizures.

Cardiovascular: Cardiovascular effects including hypotension and tachycardia have been reported occasionally.

Allergic: Skin rash, edema, photosensitization, and pruritus have occasionally occurred.

Hematologic: Eosinophilia has been reported in a few patients. There have been occasional reports of bone marrow depression manifesting as agranulocytosis, leukopenia, thrombocytopenia, and purpura.

Gastrointestinal: Nausea, vomiting, indigestion, taste disturbances, diarrhea, anorexia, and aphthous stomatitis have been reported. (See anticholinergic effects.)

Endocrine: Raised or lowered libido, testicular swelling, gynecomastia in males, enlargement of breasts and galactorrhea in the female, raising or lowering of blood sugar levels have been reported with tricyclic administration.

Other: Dizziness, tinnitus, weight gain, sweating, chills, fatigue, weakness, flushing, jaundice, alopecia, and headache have been occasionally observed as adverse effects.

Dosage and Administration. For most patients with illness of mild to moderate severity, a starting daily dose of 75 mg is recommended. Dosage may subsequently be increased or decreased at appropriate intervals and according to individual response. The usual optimum dose range is 75 mg/day to 150 mg/day.

In more severely ill patients higher doses may be required with subsequent gradual increase to 300 mg/day if necessary. Additional therapeutic effect is rarely to be obtained by exceeding a dose of 300 mg/day.

In patients with very mild symptomatology or emotional symptoms accompanying organic disease, lower doses may suffice. Some of these patients have been controlled on doses as low as 25-50 mg/day.

The total daily dosage of SINEQUAN may be given on a divided or once-a-day dosage schedule. If the once-a-day schedule is employed the maximum recommended dose is 150 mg/day. This dose may be given at bedtime. **The 150 mg capsule strength is intended for maintenance therapy only and is not recommended for initiation of treatment.**

Anti-anxiety effect is apparent before the antidepressant effect. Optimal antidepressant effect may not be evident for two to three weeks.

Overdosage.
A. Signs and Symptoms
1. Mild: Drowsiness, stupor, blurred vision, excessive dryness of mouth.
2. Severe: Respiratory depression, hypotension, coma, convulsions, cardiac arrhythmias and tachycardias.

Also: urinary retention (bladder atony), decreased gastrointestinal motility (paralytic ileus), hyperthermia (or hypothermia), hypertension, dilated pupils, hyperactive reflexes.

B. Management and Treatment
1. Mild: Observation and supportive therapy is all that is usually necessary.
2. Severe: Medical management of severe SINEQUAN overdosage consists of aggressive supportive therapy. If the patient is conscious, gastric lavage, with appropriate precautions to prevent pulmonary aspiration, should be performed even though SINEQUAN is rapidly absorbed. The use of activated charcoal has been recommended, as has been continuous gastric lavage with saline for 24 hours or more. An adequate airway should be established in comatose patients and assisted ventilation used if necessary. EKG monitoring may be required for several days, since relapse after apparent recovery has been reported. Arrhythmias should be treated with the appropriate antiarrhythmic agent. It has been reported that many of the cardiovascular and CNS symptoms of tricyclic antidepressant poisoning in adults may be reversed by the slow intravenous administration of 1 mg to 3 mg of physostigmine salicylate. Because physostigmine is rapidly metabolized, the dosage should be repeated as required. Convulsions may respond to standard anticonvulsant therapy, however, barbiturates may potentiate any respiratory depression. Dialysis and forced diuresis generally are not of value in the management of overdosage due to high tissue and protein binding of SINEQUAN.
